

Agaram
TECHNOLOGIES

A Global Laboratory Informatics Company
Making Labs **Paperless**

Overview

Genesis

- Founded in the year 1998
- Exclusively focusing on laboratory informatics software
- ISO 9001:2015 certified for
“Design, Development, Implementation, Maintenance and Support for Lab Informatics and analytical instrumentation software“
- Backed by a 60+ year old industrial house & financially stable

Presence & Offerings

- Head quartered in Chennai, India
- Direct presence in Europe & USA
- Through partners in other regions
- Key Solution Offerings
 - Qualis TM LIMS
 - Logilab TM ELN
 - Logilab TM SDMS
 - Interfacer TM

Roadmap

Well defined product
roadmap

Regulated

85% projects in
regulated Industry

Employees

75+ FTEs
supporting
customers
globally

Experience

18 Years In Lab
Informatics

Domain

100% of Projects related
to laboratories only

Quality

ISO 9001-2015

Accomplishment

100s of Projects
Completed Globally

Logilab ELN

100+types of
instruments
seamlessly interfaced

Satisfaction

100% Reference
able Customers

Qualis LIMS Functionality Snapshot

Organisation

site, department, lab, section, users, roles, rights

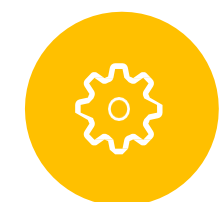

Operational Data

samples, tests, methods, instruments, specifications

Sample Registration

sample ID, aliquot, storage, barcode label, tests

Work Scheduling

personnel, instruments, cross linked to training & calibration

Results (Manual/ ELN)

result entry, pass/fail status, versioning, raw data attachments, comments, links to inventory & OOS

Approval

configurable approval workflows for different sample types, electronic signature

Traceability

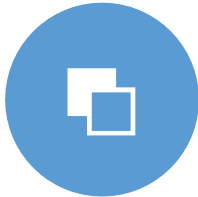

built-in audit trail, access to instrument data, inventory usage, comments, re-tests

Integration

real-time integration with external business applications

Logilab ELN Functionality Snapshot

Template Designer
WYSIWYG template designer

Sheet Release Control
Logilab sheets are release & version controlled

Instrument Integration
Interface any RS232, TCP/IP & PC based instrument

Data Capture
Template based data capture with version control on data

Approval
Review & approval workflows

Integration
Designed for integration with external systems like LIMS

Audit Trail
System has built-in audit trail for traceability

21 CFR Part 11
Designed to help laboratories comply with 21 CFR Part 11 requirements

Logilab SDMS Functionality Snapshot

Scheduler

Automatic scheduler based instrument data capture

Original Structure

Maintain original folder structure of source data

Push & Pull

Push or Pull data from instrument to server

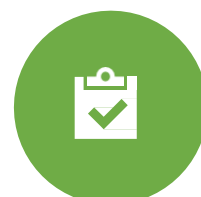

FTP

FTP is the backbone to transfer & store files in server

Tagging

Manual & Automatic extraction & tagging of relevant data

E-signature

Place electronic signature on files based on workflow

Traceability

Full audit trail for upload/download of data

Integration

System is designed to integrate with any external system

Market presence

Since inception, Agaram Technologies has established itself as the preferred solution partner to a host of global quality control and research laboratories

Thank You
